

February 2020

If you're still using 3G CDMA cellular service for your data or voice applications, you will want to upgrade to 4G LTE service sooner rather than later.

Here are expected cellular carrier shut down dates for 3G cellular service:

Verizon - No new 3G cellular activations after June 2018. Shutdown after December 2020

AT&T - No new 3G cellular activations after June 2019. Shutdown after December 2021

T-Mobile - No announcement on new 3G activations. Shutdown after December 2020.

Sprint - No announcement on new 3G activations. Shutdown expected January 2023.

Eddy Wireless can help. Our manufactures have a wide variety of 4G LTE and 5G ready antennas to support your upgraded system.

Even better, all of our 4G/5G antennas will work with your existing 3G routers/radio devices. Omni or directional. Mobile or fixed base/site. Let me know what you need.

We provide Cellular, Wi-Fi, RFID, DSRC, CBRS and GNSS (600 MHz to 6 GHz) antenna solutions. Many with combo antennas that have all requisite elements inside one radome.
